

Rally Quality Manager

Your single source of information for software quality throughout the Agile development lifecycle

Rally Quality Manager is an optional subscription module that greatly enhances the way you track and measure your product quality within Rally's lifecycle management solution. Designed specifically for Agile testing teams, Rally Quality Manager enables a continuous quality process that benefits the entire team. Testing teams can integrate testing in step with development tasks, surface test results from automated test frameworks and manage a full test strategy across projects - all within a central development hub.

Benefits

Agile practices emphasize the value of continuous testing and moving away from the 'test-last' mentality which traditional test automation tools emphasize. Agile testing teams conduct acceptance testing at the user story level before new functionality is feature complete. However, QA teams still need to perform traditional testing to verify overall product impact. Agile testing teams need the flexibility of Rally Quality Manager to track all testing activities and to advance quality within the development lifecycle.

Team Collaboration

Rally Quality Manager is designed for close-knit Agile teams and fosters communication between developers and testers, keeping the focus on delivering working software at the end of the iteration.

Better Predictability

When failed test cases are immediately available to developers, end-of-cycle defects are less likely to derail your release off schedule. Rally Quality Manager provides an accurate predictor of completion.

Balanced Resources

Beyond a single team and a single iteration, ensure you have ample team coverage over concurrent and dependent development initiatives.

Manage Change

Customizable notifications keep team members informed of new project developments, defects, build failures and code check-ins to help teams run efficiently in the face of constantly changing requirements.

Scaling Software Agility[®]

Visibility Means Increased Velocity

Rally Quality Manager integrates with leading automation platforms so that test results are surfaced to the active development project in Rally. Failed test results are no longer locked in a testing silo and are ready for resolution.

In addition, Rally Quality Manager is backed by Rally's expert technical account management staff that can guide your team, share best practices and help you migrate data into Rally.

Rally's test plan view displays regression test folders and dashboards to quickly track passing and failing test status.

Key Features of Rally Quality Manager

Test case inventory across projects

Use a complete test case inventory page and custom filters to assess quality by project or easily locate project obstacles.

Visual test plan dashboard

The test plan view displays status of your test coverage and a graphical representation of the number of test cases passing, failing or pending. Pull in automated test results to track historical testing trends.

Test folders for regression testing suites

Using test folders, group test cases into regression test suites to perform large-scale acceptance testing or any repeatable validation suite.

Integration support

Setup a waste-free workflow with pre-built connectors to leading open source and commercial test automation tools such as HP Quality Center and Fit or Fitness.

Availability and Purchase Options

Rally Quality Manager is an optional subscription module available for \$10/user/month with a Rally Enterprise subscription. Contact your Rally account representative at sales@rallydev.com for a demonstration and to discuss pricing information. Rally's 30-day free trial includes the Rally Quality Manager module to demonstrate the benefit of a complete Agile lifecycle management solution.

Scaling Software Agility[®]

Deployment Options

Your Rally account team can add Rally Quality Manager to your subscription at any time. It is available for both on-demand (software-as-a-service) and on-premises deployments.

Additional Resources

- Visit Rally's website www.rallydev.com to compare Rally editions and features
- Agile Commons, www.agilecommons.org – the largest Web 2.0 Agile community, with membership to the popular Agile Quality Management community
- Sign up for a 30-day free trial of Rally Enterprise which includes Rally Quality Manager at www.rallydev.com

About Rally

Rally is the #1 partner for Agile success through its family of products, coaching and community support. With a dedicated focus on Agile practices, Rally helps organizations of all sizes shorten their development cycles, minimize risk, and collaborate across teams and silos. Rally's on-demand Agile lifecycle management products were honored with three-time Jolt Product Excellence Awards (the industry's Oscars) in 2006, 2007 and 2008 and currently support over 360 corporate customers and 18,000 active subscribers in more than 30 countries. Rally's end-to-end solutions for Agile development also include Agile University, the largest source for Agile training, and Agile Commons, the largest collaborative Web 2.0 community dedicated to advancing software agility.
